

GNANAPRAKASH

Senior Technical Writer

Bengaluru, India | 8123729551 | gnanaprakash04@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Senior Technical Writer with 15+ years of experience across SaaS, telecommunications, and networking, specializing in end-to-end technical documentation, API documentation, structured authoring (DITA/XML), and docs-as-code. Skilled in UI/UX writing, user guides, installation manuals, online help systems, and video tutorials.

Currently own end-to-end documentation for cnMaestro (Cloud and On-Premises) at Cambium Networks, managing timely delivery, quality standards, and release planning while leading a documentation team of three. Simplified documentation management by merging separate Cloud and On-Premises content into a single Flare-based container, easing maintenance and enabling faster release cycles.

Works closely with cross-functional teams and global stakeholders across the US, Canada, Italy, and Sweden, with strong communication and stakeholder management skills.

CORE SKILLS

- **Authoring Tools:** Madcap Flare, Arbortext Editor, Adobe FrameMaker, Oxygen XML Editor, Visual Studio Code
- **Content Management Systems:** IXIASOFT CCMS, Madcap Central, Common Source Database (CSDB)
- **Image & Video Tools:** Snagit, Camtasia, Adobe Illustrator, Adobe InDesign
- **Style Guides:** Microsoft Style of Technical Publication (MSTP), Simplified Technical English (STE)
- **Process & Methodology:** Document Development Life Cycle (DDLC), Software Development Life Cycle (SDLC), Agile (Scrum), Waterfall, DITA, Markdown
- **Other Tools:** JIRA, Confluence, MS Office, Adobe Creative Cloud, SharePoint, Git, GitHub, Notepad++
- **Generative AI:** ChatGPT, Google Gemini, Microsoft Copilot, Claude AI — for editing, research, and prompt engineering

PROFESSIONAL EXPERIENCE

Cambium Networks — Senior Technical Writer

May 2024 – Present

Project: *cnMaestro* — a SaaS-based platform providing cloud-managed wireless connectivity for scalable, secure, and efficient network management.

- Lead end-to-end documentation for cnMaestro Cloud and On-Premises NMS, developing user guides, API documentation, release notes, data sheets, and leaflets using docs-as-code practices to ensure high-quality, accurate, and timely deliverables.
- Participate in Agile and Scrum meetings, collaborating with cross-functional teams to gather, validate, and align documentation with development cycles.
- Create, manage, and assign work through JIRA; track feedback, monitor blockers, and drive change management activities.
- Create and maintain user guides and context-sensitive online help (CSH) systems using structured authoring (DITA/XML), ensuring style compliance, accuracy, and alignment with new product releases.
- Design, localize, and review multilingual product leaflets using Adobe Creative Cloud, InDesign, and Illustrator.
- Conduct peer reviews and test documentation for accuracy, completeness, consistency, and alignment with platform functionality.
- Maintain version control by branching and managing XML files in the Madcap Flare Central CMS across multiple releases.
- Integrate Generative AI tools into the documentation workflow to accelerate authoring, improve content consistency, and support technical research and editing.
- Explore Markdown and docs-as-code workflows using Visual Studio Code and GitHub to evaluate modern, version-controlled approaches to technical documentation.
- Create training plans and materials to support knowledge transfer for new hires.

Nokia — Customer Documentation Developer

February 2023 – May 2024

Project: *WaveSuite — a software suite enabling automation, optimization, and assurance for networks, streamlining service delivery and operational efficiency.*

- Created and updated user and installation guides and release notes for WaveSuite products in alignment with Nokia standards.
- Collaborated with SMEs, testers, and product owners in an Agile environment to analyze requirements and deliver accurate documentation.
- Managed Arbortext XML file branches in the CMS for releases and version control.
- Developed feature video scripts and produced product demonstration videos using Camtasia.
- Contributed to the Online Help (OLH) team, building and publishing OLH content in line with release cycles using FileZilla and PuTTY.
- Integrated customer feedback from surveys into documentation improvements, enhancing clarity and usability.

Cambium Networks — Senior Technical Writer

October 2019 – February 2023

Project: *Cloud and on-premises NMS suite — a software suite designed to simplify networking deployment, management, and optimization.*

- Led the migration of cnMaestro documentation into Madcap Flare, improving usability and user experience.
- Developed user guides and release notes for the new NMS GUI of the NSE product, focusing on the UI/UX interface.
- Maintained and updated documentation to reflect new features and platform enhancements, ensuring accuracy.
- Streamlined publishing workflows, reducing release documentation time by 30%.
- Created datasheets, technical documents, and multilingual content for global customers.
- Interacted with geographically distributed development and marketing teams to understand user requirements.
- Actively contributed ideas to improve documentation processes and content quality.

Innovatia — Technical Writer

February 2019 – September 2019

Project: *Noregon (JPRO software) — streamlines diagnostics and troubleshooting for vehicle repairs.*

- Migrated content from Word to DITA XML, improving structure, consistency, and reuse across documents.
- Created and maintained user guides and release notes for JPRO software using Oxygen XML Editor, working closely with SMEs and developers.
- Reviewed documentation for technical accuracy, clarity, and adherence to style standards prior to release.
- Calculated estimated completion timelines and communicated delivery dates to stakeholders.
- Supported new-hire onboarding by sharing product knowledge and company work culture.

Capgemini — Technical Writer

August 2011 – February 2019

Project: *Bombardier — software solutions to optimize safety, efficiency, and performance in transportation systems.*

- Authored and revised the Component Maintenance Manual and Illustrated Parts Catalogue using Arbortext Editor, by analyzing service bulletins and technical documents and coordinating with the engineering team.
- Reviewed peer-authored documents, proofreading and editing content for accuracy and consistency.
- Assisted in creating and updating documentation checklists, streamlining the review process and improving team efficiency.
- Collaborated with cross-functional teams to incorporate feature updates into documentation.
- Organized team efforts to meet delivery targets and maintained ownership of documentation outcomes.

RECOGNITIONS

- Quality Champion Award, Nokia (December 2023) — for producing a high-quality user experience video showcasing a new WSP feature.
- CEO Excellence Award, Cambium Networks (April 2022) — for delivering high-quality cnMaestro user documentation.
- Star Performer Award, Capgemini (January 2016) — for exceptional technical writing and outstanding contribution to documentation quality.

EDUCATION & CERTIFICATION

- Certificate in Software Technical Writing — TechTotal (October 2014)
- Aircraft Maintenance Engineering (Mechanical Stream) — VSM Aerospace College of Engineering (September 2009)
