Timeline

Profile Summary

Senior Technical Writer with 14+ years of experience in SaaS, telecommunications, and networking, specializing in end-to-end technical documentation, API documentation, structured authoring (DITA/XML), and docs-as-code, with expertise in UI/UX writing, user guides, installation manuals, online help systems, and video tutorials.

Experienced in handling end-to-end documentation for cnMaestro (Cloud and On-Premises), ensuring timely delivery, quality standards, and effective planning. Led a documentation team of three members, ensuring smooth coordination, consistent output, and on-time completion of deliverables.

Simplified documentation management by merging separate Cloud and On-Premises content into a single Flare-based container, making maintenance easier and enabling faster release cycles

Works closely with cross-functional teams and global stakeholders across the US, Canada, Italy, and Sweden, with strong communication and stakeholder management skills.

Skills

- Authoring Tools:** Madcap Flare, Arbortext Editor, Adobe FrameMaker, Oxygen XML Editor, and Visual Studio Code (VS Code)
- Content Management Systems (CMS):** IXIASOFT CCMS, Madcap Central, and Common Source Database (CSDB)
- Image and Video Tools:** Snagit, Camtasia, Adobe Illustrator, and Adobe InDesign
- Style Guides:** Microsoft Style of Technical Publication (MSTP) and Simplified Technical English (STE)
- Process:** Document Development Life Cycle (DDLC) and Software Development Life Cycle (SDLC)
- Methodologies and Documentation:** Agile methodology (Scrum), Waterfall methodology, DITA, and Markdown
- Other Tools:** JIRA, Confluence, MS Office, Adobe Creative Cloud, SharePoint, Git, GitHub, and Notepad++
- Generative AI:** ChatGPT GPTs, Google Gemini Gems, Microsoft Copilot Agents, and Claude AI for editing, research, and prompt engineering.

Cambium Networks

Senior Technical Writer

(May 2024 to Present)

Project: cnMaestro – A SaaS-based platform that provides cloud-managed wireless connectivity for scalable, secure, and efficient network management.

Role Description:

- Lead end-to-end documentation for cnMaestro Cloud and On-Premises NMS, developing user guides, API, release notes, data sheets, and leaflets using Docs-as-Code practices to ensure high-quality, accurate, and timely deliverables.
- Participate in Agile and Scrum meetings and collaborate with cross-functional teams to gather, validate, and align documentation with development cycles.
- Create, manage, and assign work through JIRA, track feedback, monitor blockers, and drive change management activities.
- Create and maintain user guides and context-sensitive online help (CSH) systems using structured authoring (DITA and XML), ensuring style compliance, accuracy, and alignment with new product developments and updates.
- Design and review the product leaflets using tools such as Adobe CC, InDesign, and Illustrator.
- Conduct peer reviews, thoroughly testing documentation to ensure accuracy, completeness, consistency, and alignment with platform functionality.
- Maintain version control by branching and managing XML files in the CMS for multiple releases.
- Integrated Generative AI tools into the documentation workflow to accelerate authoring, improve content consistency, and support technical research and editing.
- Guide and mentor team members to ensure smooth execution, knowledge sharing, and drive innovation.

Nokia

Customer Documentation Developer

(February 2023 to May 2024)

Project: WaveSuite – A software suite that enables automation, optimization, and assurance for networks, streamlining service delivery and operational efficiency.

Role Description:

- Developed and maintained user, installation, and troubleshooting guides for WaveSuite products in alignment with Nokia standards.
- Collaborated with SMEs, testers, and product owners in an Agile environment to analyse requirements and deliver accurate documentation.
- Managed Arbortext XML file branches in CMS for releases and version control.
- Developed feature video scripts and produced product demonstration videos using Camtasia.
- Created Knowledge Base (KB) articles and online help systems to support self-service customer solutions.
- Integrated customer feedback from surveys into documentation improvements, enhancing clarity and usability.

Cambium Networks

Senior Technical Writer

(October 2019 to February 2023)

Project: Cloud and on-premises NMS suite – A software suite designed to simplify networking deployment, management, and optimization.

Role Description:

- Led the migration of cnMaestro documentation in Madcap Flare, which improved usability and user experience.
- Developed user guides and release notes for NMS GUIs, focusing on UI/UX interface.
- Maintained and updated documentation to reflect new features and platform enhancements, ensuring accuracy.
- Streamlined publishing workflows, reducing release documentation time by 30%.
- Collaborated with Agile teams, SMEs, and marketing to align documentation with product releases.
- Created datasheets, technical documents, and multilingual content for global customers.
- Assisted in onboarding new hires and conducted training sessions on documentation processes.

Innovatia

Technical Writer

(February 2019 to September 2019)

Project: Noregon (JPRO software) – Streamlines diagnostics and troubleshooting for vehicle repairs.

Role Description:

- Created user and troubleshooting guides by collaborating with SMEs and developers.
- Migrated content from Word to DITA XML using Oxygen XML Editor and XIAsoft CMS.
- Managed documentation lifecycle using JIRA for tracking and progress visibility.
- Reviewed tasks and provided daily progress reports to stakeholders.
- Trained new hires on technical publication processes and DITA best practices.

Capgemini

Technical Writer

(August 2011 to February 2019)

Project: Bombardier – Provides software solutions to optimize safety, efficiency, and performance in transportation systems.

Role Description:

- Developed user manuals, online help, and SRS documents for transportation software.
- Led a review team to ensure content quality and adherence to standards.
- Managed content using Arbortext and maintained structured documentation.
- Collaborated with cross-functional teams to incorporate feature updates.
- Organized team activities to enhance ownership and delivery accountability.

Deliverables

User Guide	Release Notes	Installation Guide	API Guide
Video Tutorials	Product Leaflet	Data Sheet	Online Help

Recognitions

- Quality Champion Award, Nokia – December 2023
Awarded for producing a high-quality user experience video showcasing a new WSP feature.
- CEO Excellence Award, Cambium Networks – April 2022
Recognized for delivering high-quality cnMaestro user documentation.
- Star Performer Award, Capgemini – January 2016
Awarded for exceptional technical writing and outstanding contribution to documentation quality.

Education and Certification

- VSM Aerospace College of Engineering – September 2009
Aircraft Maintenance Engineering (Mechanical Stream).
- TechTotal – October 2014
Certificate in Software Technical Writing.
